Robert Norman	Seaker Overall Avg:	4.715
Presentation was fair, balanced and free from commercial bias		4.74
		4.74
Teaching Methods/Ability		4.68
		4.68
Demonstrated Expertise and effectively communicated the topic		4.73
		4.73

Content was good. Good presenter.

Great speaker but would have appreciated something geared more toward how the WOC nurse can assist.

MOST EXCELLENT SPEAKER! Knows subject matter and great photos and case studies. Best of all he captured us with his awesome harmonica music - Dr Norman wins the prize for most entertaining and personable speaker, ever!

Learned some new information; good to know about sunscreen. Engaging speaker....and great harmonica player!

Good slides.

Our body's largest organ, this is great info for All nurses.

very enjoyable speaker, engaged audience. Subject expert, appreciated case presentations

awesome speaker! Loved this guy. Taking his practice into skilled nursing facilities is an interesting idea. Music was fun.

Loved the personal touch and encouragement of audience participation. Felt like this topic sounded great but felt he went to far in the medical aspect of diagnosis and treatment versus what a WOC should be looking for if cancer is suspected

Very relevant

The session is very informative especially the case studies

loved the blues harp

Great topic to alert us all personally and in our practice.

Enjoyed the music provided, you are pretty talented

Skin cancer is especially hard here in Florida. It is really difficult to have esp. young people need to protect skin. Waited till last to hear Dr. Norman but he was well worth it. Loved his herminica. Perfect end to excellent conference

Would like more information on current treatment guidelines for the different cancer types.

very interesting and engaging

Did not realize that melanoma had a heavy genetic component, cutaneous horn has squamous cell carcinoma at base so all of it has to be excised, T-shirts are 8 SPF . . . thanks for this information!

Thank you for honoring your commitment to our conference! You provided a great presentation! LOVED the harmonica!!!! What a great way to end a conference!!!

Enjoyed the presentation

Great topic for us nurses living in the Southeast with the retired sun worshipers of years ago! But how to manage and treat early with better outcomes was stressed!!

Again another nail biter in terms of making it to the conference. Starting and ending with playing the harmonica was unique but the group seemed to like it

very interesting to hear about the mobile radiation van! I loved that he started out playing the harmonica for us

Early Dermatology consult for skin changes will result to successful RX. Thanks for the music entertainment .

It is amazing to know the magnitude of skin disorders.

loved the speaker!

Dr. Norman described several types of skin cancer. In addition he pointed out that smoking decreases wound healing. Furthermore, he emphasized that sunscreen needs to be reapplied throughout sun exposure and that protective clothing is best.

Dr. Norman could entertain a rock. He is a HOOT! Loved the music. I would have liked a little more information about the elderly population skin problems and treatment. He sounds very busy, but passionate on his care.

i really liked this session. off the beaten path but very relevant for us! would enjoy him again in the future.

That was a great lecture!

Very informative- enjoyed the case studies and images of cancer enjoyed the harmonica solo

Harmonica aside (which was also fabulous), what a great presentation - Give me pictures & case studies & I am hooked!

Excellent speaker.
