Q3: Were you able to apply the new information into your current practice?	113	99.12%
Q4: If not, what were the obstacles?	2	1.75%

Comments Received:
Different states and regions of our country have different LCDs and different priorities. Here in the South we have significant issues specifically with noncompliance, obesity, DM, smoking, PAD. Much of the excellent information from the presentations requires customization for our patients.
The level of information was not new to me except for the extra information of the role of collagen in the KCI lunch--I use it in the wound seminars that I teach. The information from the surgeon about bowels was interesting but I don't refer for that. The information of caffeine was a fascinating lecture that I found more useful for myself.
