1. Have an increased knowledge regarding care and information essential to ostomy patient rehabilitation.	149	4.812

Dorothy Doughty	Seaker Overall Avg:	4.823
Presentation was fair, balanced and free from commercial bias		4.83
Teaching Methods/Ability		4.80
Demonstrated Expertise and effectively communicated the topic		4.84

A wonderful session with excellent presenters. They provided such good information.

I really enjoyed hearing the first hand perspectives and challenges!

The Q & A session seemed to get side tracked away from the panel, which was too bad.

unique perspective

great session, good insights from the patronage panel!

favorite session!

The panel was very open with discussion and very willing to answer questions very matter of factually. Definitely a different perspective. Very enjoyable!

BEST PART of conference!

I always learn from the ostomy panels. this one was excellent.

I have always appreciated hearing the "lived" experiences of our patients and this time was no exception.

This session emphasized the need for ostomy nurses to focus on education both pre and post ostomy surgery.

You should have different ostomates each year. But their advice to WOCNs is always welcome.

Wish this could have been longer! It was so nice to hear from ostomates in this setting.

One of my favorite sessions

truly enjoyed listening to these stories and suggestions for our practice

great useful information

Always enjoy the panel. Good insight.

wonderful presentation...panelists were great

awesome panel

Great panel. Loved that the wife was there to give a caregiver's stand point. would have loved a child up there

Loved the panel. Good information

Always enjoy panel presentations because of personal insight from experience of panel.

It was great and very meaningful hearing information from those who have lived experience.

listening to patient is important early on

I learned so much from the panelists as they were so candid and open. In addition, their stories were all so different that it gave a good perspective from various disease process backgrounds.

Experiences give insight of how to approach patients.

Many of the personal experiences made me cry! Appreciate the honesty of the panel.

was a good session. did not feel beat up but encouraged with this years panel.

great panel good info from panelist that will improve my sexuality teaching with patients

I enjoyed hearing from each of the panelists and appreciate their willingness to honestly and openly answer questions.

I found it very helpful to hear the stories of the 3 ostomates and 1 spouse. Always love hearing more from my coworker, Joanna Burgess.

I appreciate those on the panel opening up and being candid with their answers. Such a great perspective and I got a lot of great ideas and things to do to sharpen my practice. Thank you so much

This session was so insightful as to the lived patient experience, and what we can do as ostomy nurses to help them along.

So informative, I really enjoyed hearing the personal experiences.

The panel was awesome, as usual. It was especially nice to hear from the spouse of one of the panelists. Dorothy is always a treat!

This was an excellent panel, very informative and interactive. Really enjoyed all aspects of this panel.

helped me tailor my preop teaching.

Always enlightening and entertaining!

It was great and is always great to hear it straight from the patient and their family. I also learn so much from my patients and that information helps me be a better WOC nurse to future patients.

This was one of my favorite sessions. It gave me great input for working with my ostomy patients day to day and in the future. The panel was great! Next time, also include an older ostomate.

I honestly wish this could have been a longer session. So much great heart to heart information! One idea (if possible) is to involve a patient or 2 that did not have a planned ostomy--we interact quite frequently with unplanned ostomates that have not h

Plenty of time allowed for answering questions

I really appreciate all of the ostomates, particularly our very own Joanna Burgess (congratulations for WOC Nurse of the Year!) providing personal, but insightful information about dealing with their ostomies. Dorothy is always a great moderator!!!

Wonderful panel. Good to know what is needed from the patient's point of view. Thanks to all the panel and to Dorothy!

Very interesting stories, life experiences being an ostomate. Panelist very supportive of vendors who reached out to them with f/u Patient education was one of their priorities and expectations from staff.

The panel presentation was by far my most enjoyable experience of the conference. It was most beneficial to practice to speak to those about what can be improved and what actually worked. It puts a positive face to the hard work WOCNs actually do.

THIS SESSION WAS VERY BENEFICIAL IN THAT IT REITERATED THE IMPORTANCE OF SOME OF THE THINGS WE DO AS OSTOMY NURSES THAT OFTEN SEEM REDUNDANT OR, AT THE TIME, OF LITTLE VALUE. I WILL CONTINUE TO DO THE "LITTLE THINGS" LIKE I TRY TO DO AS THIS PANEL HELPED

I could listen the these people talk all day

Panelists were well spoken. It was very good to hear their varying perspectives on the care they received. Moderator was excellent.

PHENOMENAL!!! Patient's personal experiences are so helpful to me as a WOC nurse.

good to hear what our ostomy patients would like for someone to tell them

Love the live experience

very informative .

Psychological aspect identified & discussed their experiences to understand further what patients go through.

Best session of the conference!

great insight. Really appreciate this groups willingness to share

Great perspectives, took notes the whole time, would have like to hear from geriatric population as well.

Panel participants were very articulate and heartfelt in their contributions. Dorothy was on target as usual

Dorothy does no wrong. Insightful and inspirational.

This was a very informative session. I am not ostomy certified, but get questions from nurses I come in contact with regarding working with ostomates. I have a family member who may be faced with having an ostomy, so was great discussion about how to pre

Excellent!!!!

Wonderful to hear the experiences of different ostomy patients.

LOVED, LOVED, LOVED this session!!! Very insightful into the daily life of an ostomy patient beginning with identification of the disease process all the way through the post op period. This group of speakers was sensational!

Very nice to hear from real ostomates

one of the best sessions of the conference

Awesome to hear from ostomy patients regarding challenges they face. Revealed topics and concerns that I can now take back and discuss with my patients.

This was one of my favorite parts of the conference. It was nice to see different perspectives on how people experienced healthcare and what tips/tricks they recommend for nurses currently practicing on this topic. I really liked that one of the panelist
