Presentation was fair, balanced and free from commerical bias		4.85
Teaching Methods/Ability		4.79
Demonstrated Expertise and effectively communicated the topic		4.83

Clear concise presentation with valuable information. Good overview.

Wonderful

Very enjoyable presentation

I started nursing in 1973 so I remember most of the primitive pouching systems. They were quite intimidating to me and even more so for patients. Janice did a great job in covering this topic.

This session brought back many memories!

Interesting information of history of ostomy supplies.

Interesting to see where we have come from, appreciate the new advances.

great info

nice overall view

very enjoyable for the history of pouches and the evolution! Thanks!!

loved seeing the history and tying it to our current practice

Would be interesting to see what is being done in developing countries.

hmmm....

the history info was very interesting

Nice stroll through history, presented very effectively

loved the historical perspective of our practice! Great information!

Janice is an excellent speaker. She has that calming voice that you wished was on your shoulder when you can't get a pouch to stay on more than a day, telling you step by step how to accomplish your goal.

Great presentation

It was interesting seeing the old appliances that patients had to use

Too much info to cover. Would like to hear more about stoma site marking and case studies of pouching techniques

Great history and presentation of the evolution of pouching systems. Wish there had been more time to discuss the barriers available now

The PowerPoint print out didn't follow the slides so that was a little distracting but overall the history and information was very interesting and helpful. Thank you!

Very good refresher on the types of adhesives and the history of pouches

spent too much time on old id pouching systems and then had to rush through research.

Loved seeing the history of pouching, again. Have seen similar presentations but each presenter has always had something a little different.

great history of pouching systems!! Very interesting!

excellent photos of the beginning of pouching, info on slides not on electronic handouts.

VERY INTERESTING TO SEE THE HISTORICAL PRODUCTS

spent too much time on history

The history was very interesting but may have taken away from time to discuss current system benefits more closely.

Learned a few new tips.

Excellent history of pouching techniques. Excellent presentation-well organized and informative.

good information about pouching options - oval

was good presentation. informative. thank you Ms Colwell

Enjoyed learning history of barriers/ appliances

Excellent presentation. I learned so much and loved learning the history of pouching systems.

Great to see how far we have come in pouching systems. Inspired faith in future of ostomy care.

I plan to develop a similar presentation for our Ostomy Support Group. It was wonderful!

Very helpful

Very interesting information, great retrospective and historical account. I like to share this information with my patients so they understand the product progress and changes to meet their needs.

each patient is unique

It was very interesting to learn about past pouching systems. We've come a long way!

Great review of history of pouching great presentation for ostomy support groups

Learned a lot about pouching. I am not an ostomy nurse, but wanted to attend for basic knowledge. Was very well presented and pertinent information. Thank you.

excellent speaker --as always

very interesting and practical

Very helpful.

history was fascinating

Very nice to have receive an historic perspective of pouching systems. Detailed info on Karya was very useful.

Neat to see our history

Interesting to see the evolution of pouching systems.

I really enjoyed this presentation. I was amazed to see what one of the first pouching systems looked like. I had never seen anything like that in my entire career. I liked the tips given in the presentation about placing appliances. I liked learning abo

loved the history and the evidence

Very interesting

cool to see where we have come from with pouching especially since Joanna Burgess was able to state her experiences with early ostomy products

It was very interesting to see the original pouching systems.

great historical review

Interesting to see the photos of the first pouches.

Fabulous historical perspective!

the history of pouching was interesting. speaker provided some useful tidbits and practice suggestions

Would liked to have more on the new instead of so much on the old.

Loved the pictures.

Jan Colwell is always a joy to present to our conference membership! I found it interesting that 1/8-inch clearance was initiated due to firm faceplate and is not really relevant with our current wafers. Fun to see the history of pouching.
