

**9/29/2017 201704 A Strategic Plan for Perioperative Pressure Injury Prevention (PIIP)**

| Objective   | # Resp | Avg.  |
|---|--------|-------|
| Describe the role of the WOC nurse in creating strategies to reduce the incidence of hospital-acquired pressure injuries in the surgical population | 184    | 4.848 |
| Identify the factors that increase the risk of pressure injuries in the surgical patient  | 184    | 4.837 |

| <b>Susan Scott</b>  | <b>Seaker Overall Avg:</b> | <b>4.820</b> |
|---|----------------------------|--------------|
| Teaching Methods/Ability                                      |                            | 4.80         |
| Presentation was fair, balanced and free from commercial bias |                            | 4.83         |
| Demonstrated Expertise and effectively communicated the topic |                            | 4.83         |

Great poise, funny, informative on a highly important subject that I do not recall that has had a lot of attention in recent national conferences. I appreciate the work Susan Scott has done in perioperative pressure injury prevention. First I have heard

Thank you Susan for helping provide us with EVIDENCE BASED WOUND CARE issues AND solutions!

good topic with focus on education of organizations and peers.

This session surprised me. Susan is an excellent speaker and very creative in her approach. I will return to my place of employment and share this information with the OR manager.

engaging speaker

Vast new knowledge obtained

Susan was very informative and I definitely look forward to sharing her information with my colleagues at work. I will say however, there was a lot of time dedicated to self promotion. It's ok a few times but it shouldn't be pervasive throughout the whole

skin assessments, preventative interventions, skin slippage, pre-inter-post op risks, bradens and the scott triggers, I thoroughly enjoyed this speaker

This was the session that I took the most notes and appreciated the most from. Suzy was an insightful, dynamic speaker that helped me to view areas that I need more information on in regards to perioperative nursing and PUP. I have already had a conversa

Excellent tools. A topic not often addressed at our workplaces.

I think she was self promoting

great speaker- good ideas!

Very informative

Awesome speaker entertaining and informative

This was an excellent program. It is my 2nd favorite, right behind the session on high output ostomy by Muldoon and Ruescher. I was not all that excited about the topic, but I really loved it. Learned alot, and helped me to recognize how much assistance

most useful session

Excellent and so useful! Thank you for this.

Informative, good examples

Susie is a delightful and effective speaker!

Acknowledge both sides of the room when questions are asked.

learned a lot. love this speaker's presentation; my hospital is working on OR related PI prevention.

Loved this session. I will be able to take back great information to my facility.

Wow, this was a great presentation with very useful information. Susan is quite resourceful!!!

I am bringing this back to my organization! The Scott Triggers is great!

Current hot topic in our facility, very timely and often forgotten source of pr. inj.

tool on her website that can be used to create bundles for peri-op and post-op

great information, poster presentation was excellent also

I loved the information on the Scott Triggers. Susan is a fantastic speaker. Loved how she was willing to come to different hospitals to educate the pre, peri, and post operative staff on how positioning, proper size for weight limits and proper padding

Very helpful

Certainly is something we needed to hear and will be making changes accordingly.

Needed to be more organized in presentation.

so much information was presented, I feel I need to review to pull out specific tasks to address. I am a fairly new WOC so it was a bit overwhelming to discern what to attack first, but feel speaker will be great resource.

Very knowledgeable speaker

Interesting content. Good speaker.

I would like to have known more about validity and reliability of this tool

I felt like the tool presented in this presentation was great for hospital surgery use. I felt the speaker spent a lot of time referencing her achievements and I would liked to have heard more about the impact of the tool, outcomes, etc.

good information

Suzy was an excellent speaker, very knowledgeable, enthusiastic about WOCN making a difference in this area. Raised awareness of need for change!

Interesting and something we can consider at our facility however, the speaker was self-promoting, a little too much.

I had just recently learned about Scott Triggers as we have been fighting to get sacral dressing protocol approved in our facility--we had some major pushback from the ex dir of surgical services. We were able to get it approved and Scott Triggers was a m

I felt the speaker did not talk in logical sequence which made it difficult to follow her specific line of thought. Too many times jumping from one idea to another. Assuming all had experience with flow of obligations and work in the OR. Needs to be more

very glad this topic was brought to conference!

very informative!

excellent speaker with timely information
