

9/29/2017 201706 CARE (Continence and Retraining Elimination) Clinic

Objective	# Resp	Avg.
Become familiar with University Pediatric Urology's Continence and Retraining Elimination (CARE) Clinic	158	4.766
Understand the physiology and basic treatment plans for Bowel and Bladder Dysfunction (BBD) in pediatric patients	158	4.759

Amber Wetherington	Seaker Overall Avg:	4.766
Teaching Methods/Ability		4.72
Presentation was fair, balanced and free from commercial bias		4.80
Demonstrated Expertise and effectively communicated the topic		4.77

too basic
Enjoyed her topics on continence. Currently do not work with children but never know when a career change will include children. Thank SER WOCN Society for inviting her to speak to us. Articulate and informative.
very interesting
Informative
not currently relevant to my practice at present; but good information and great introduction for awareness of available services
Interesting
Info wasn't necessarily relative to me as a nurse, but informative of a first time mom with an eleven month old.
Do not use in practice but informative
Not being in Peds, it was not very relevant to my practice. However, it was very information. The presenter did a fabulous job. Good information.
I really thought i would dislike this session but it was very interesting and i learned quite a bit!
It's always a pleasure to be instructed by people who are passionate about their field.
Excellent session
Pediatric approaches, guidelines and psychosocial issues, bladder function and lab/testing,tx options, constipation is a big issue with peds.
Interesting even though I don't work with pediatric patients.
This session was very good and informative. Only suggestion would be to decrease frequency of use of "you guys". Otherwise was great.
Lots of material; slides plain and simple
Did not pertain to my practice but interesting
Pediatrics does not apply to my practice but it was interesting
looking at the holistic picture for root cause of issues
shed light on often overlooked/unidentified issues
I liked how Amber discussed how these kids feel as well as what they are physically going through. It is nice to know there are clinics like Amber's available to families.
It's always a pleasure to be instructed by people who are passionate about their field.

no interest

Excellent session

Really enjoyed this speaker, even though I do not practice in pediatrics! Great information.

I liked that a pediatric topic was included in the conference sessions this year. It was interesting to learn about different urinary issues that can occur in the pediatric population.

great info for peds and incontinence in general

Ways we can all address BBD with patients of all ages.

Easy to follow line of thought.

There was entirely too much time used on pottie training, which 99 % of us are not involved with in our professional field and NO information on incontinence of geriatric patients

Very helpful, thanks.
