

9/30/2017 201713 The WOCN® Society's Support Surface Algorithm: Bridging Expert Opinion and Science for Clinical Decision Making in Support Surfaces

Objective	# Resp	Avg.
Demonstrate increased awareness and knowledge of and be able to use the WOCN Society's Evidence and Consensus Based Support Surface Algorithm	136	4.684

Dianne Mackey	Seaker Overall Avg:	4.664
Demonstrated Expertise and effectively communicated the topic		4.64
Presentation was fair, balanced and free from commercial bias		4.79
Teaching Methods/Ability		4.57

good update

the software was a little hard to follow at first but I think it's just a matter of getting used to it. Great information!

on-line algorithm to choose the right sleep surface for your patient, For my purposes in LTC/SNF this is too time consuming, I can see this working great in acute care settings.

I realized after attending that I DO NOT know as much about support surfaces as i once thought and really should use this tool from now on!

Very informative. I will provide more education on this algorithm to my colleagues after attending this session.

I think I finally get it. Thanks for adding to product list.

Have had this app since the 2015 National conference in San Antonio but have just now learned exactly how to use it. Thanks!

I had a problem following this session

Enjoyed walking through the web based algorithm

This was a difficult topic to present. Good job.

Many technical glitches.

Was not organized- web site was not that great. Basically felt like the presentation was just of the app- not the knowledge.

Information from this session allowed me to engage our CNO to initiate this Algorithm house wide!

It is always more impactful to hear from an actual contributor to what we use in practice.

Great tool for the acute setting

plan on using this app

Loved the interactive teaching with the website, good tool to bring back to the clinicians I work with

did not think this was going to be interesting but it was great. Appreciate going through the online algorithms

OK class

Did a very good job on a very boring topic. Wonderful material and research that has been needed for sometime in practice situations. This was much needed information by practicing WOCN nurses.Very helpful.

Good presentation. I don't have much use for the algorithm our options are very limited due to cost mitigation in my hospital; we have one Group 1 and one Group 2 support surface other than our ICU surfaces and our bariatric frames and surfaces. I can see

I'm glad we worked on the Algorithm together.

This presentation has been presented at national and the aid has been out a number of years...not new info?

I liked that we were able to try the app out.

Thanks, I didn't realize that existed. I will utilize it in my practice.

I liked how she explained who and from all over the us the panel was greater.

Sorry to say I do not remember much about this presentation

unaware of the tool for choosing a surface. Taking this back to my facility to put into practice

This is a great tool - love that is applicable across the continuum
