<b>Martha Davidson</b>	<b>Seaker Overall Avg:</b>	<b>4.818</b>
Teaching Methods/Ability		4.80
Presentation was fair, balanced and free from commercial bias		4.83
Demonstrated Expertise and effectively communicated the topic		4.82

One of my favorite sessions at every conference - thanks for offering this
One of my favorites
always nice to hear others nightmares and treatment successes
Great ideas, also good to know others have such difficult cases too and there are others to reach out to for ideas how to manage
wished there were after pictures
difficult to ask questions and hear others comments without microphones being stationed around the room
excellent session with 3 presenters and unique situations theyve encountered.
Love these sessions! Hope they continue to remain part of our conference
great tid-bits and cases. Thank you.
creative and well done
very useful information
I really enjoyed and appreciated 3 WOCN nurses with a lot of experience and their pictures/stories of difficult ostomy patients. It was very relatable conversation topic and tips I can directly apply into my practice.
creative and well done
different types of pouching and techniques
This is my favorite part of conference! Great case studies!
Would have liked more pictures. Yes, I know that was not practical for the applications or the patient comfort. Good job.
love this session
would have like pictures or actual models of what they used on these difficult ostomies so I could replicate these innovative ideas on my pt
Very interesting!
The panel was comprised of so many knowledgeable individuals.
Valuable information. Thanks, Martha & Jennie
Great nightmares presented . . . love to see this presentation every year.
n/a
very good informative real to life information that can be used today.

this was great

Interesting cases. I especially appreciate it was recognized that we sometimes experience impossible pouching situations no matter how knowledgeable we are. Very good presenters and a good session!

Always my favorite session. I work alone in a small community, so enjoy seeing these nightmares and hoping I'll know what to do when I am presented with one!

Reassuring to see others having challenging cases and how they resolved the issues.

Always a timely discussion as we all have our "nightmares" Comforting to know we are not alone!

Great presentation on challenging issue for ostomates and clinicians

Great examples! Wonderful panel!
