

9/20/2018 201802 What's That Funny Lookin' Thing in My Spyglass? Atypical Wounds

Objective	# Resp	Avg.
Differentiate between pyoderma gangrenosum, calciphylaxis, HIT syndrome, coumadin necrosis and necrobiosis lipoidica	154	4.870
Recommend topical/systemic pharmacologic/nonpharmacologic interventions to manage the patient with calciphylaxis, pyoderma gangrenosum, HIT syndrome, coumadin necrosis and necrobiosis lipoidica wounds	154	4.851

Janice Beitz	Seaker Overall Avg:	4.920
Teaching Methods/Ability		4.89
Presentation was fair, balanced and free from commercial bias		4.94
Demonstrated Expertise and effectively communicated the topic		4.93

Reinforced how important it is to have collaborative care plan with appropriate disciplines. Gained some great ideas for possible treatment options.

This session was awesome! I wish it was longer. The information she presented was key to help differentiate between conditions. Thank you!

great speaker

GREAT!

Excellent

Has made me more interested in knowing the difference in calciphylaxis, PD and HIT Syndrome, coumadin necrosis and necrobiosis lipoidica wounds. Very interesting.

Janice Beitz was a pleasure to listen to, and I found her discussion to be particularly useful for acute care WOC Nursing.

Extremely informative! Great reference list!

informative

Wonderful refresher

Great information

lecture was a little rushed

Thankful for info on HIT Type II.

Can listen to ms beitz all day-to-day great!

Fantastic presentation, motivated me to decide to develop a tool to differentiate these horrible wounds. I learn best by teaching myself sometimes, so this session was very motivating for me to really understand the differences.

Love Dr. Beitz's approach to learning.

excellent speaker, very engaging

Dr. Beitz proves herself to be very knowledgeable about the subjects she teaches. She is a joy to listen to.

wonderful content

Good visuals

Loved it!

Janice Beitz was informative and dynamic. So interesting. She held my attention from beginning to end.

Great presentation and informative of those wounds that are atypical and not seen very often for some of us.

Very informative

Very interesting

Informative, interesting, have already referred back to my notes since returning to work!

Very informative

Janice Beitz is a spectacular speaker. She is very captivating.

Great new information. Excellent speaker

Good information. Covered a lot of material in a very quick manner. Glad I have access to slides.

Excellent presentation and engaging speaker. Thank you.

Speaker pointed out some very interesting differences in the above appearances for differentiation.

Loved the comparison of calciphylaxis as an MI of the skin and great reference for differential diagnosis. Speaker entertaining as well as educational.

Excellent presentation. Despite my experience with these wounds, I felt that I left with more knowledge in my tool box. Janice is always excellent.

This was an interesting session. I learned a few new tricks in the assessment of weird wounds.

Very helpful

Good information..great speaker... wonderful knowledge

Excellent presentation.

I enjoyed the diverse abnormal wounds.

Good speaker

Difficult topic- well done

Very informative

GOOD

Excellent topic. Very informative and entertaining.

Excellent

GREAT Session! She is an excellent speaker.

Very informative

Dr. Beitz can make anything interesting. because her delivery is so good. She clarified appropriate treatments for unusual wounds.

Excellent information re very important atypical wounds! Great review and learned a few things I didn't know about HIT Syndrome and Coumadin Necrosis!

This was a lot of great information! The presentation could have been longer.

I have not seen most of these atypical wounds as I work mainly with post-op surgical oncology patients. This was very educational for me.

This was of interest to me and my setting at an out patient clinic. I will be taking this information to share with my coworkers.

Learned a lot of new information from this.

Good review of differentiation of atypical wounds

Loved this presentation; very informative and will be very helpful in identification of atypical wounds in the future

Great info. Very helpful to my practice

I love her!

Very informative

Very educational

Presentation well done

Great information on the most common atypical conditions. Easy to transition to practice unlike some atypical lectures I've heard.

Loved DR. Beitz

great information

I didn;t know much about necrobiosis lipoidica, very interesting topic.

More sessions con this topic

Such an interesting lecture and very useful for my work in the acute care setting where sometimes it is difficult to distinguish wound type.

Excellent and pictures were excellent, could have listened to another hour of this topic

Janice is a great speaker and so knowledgeable

Great reinforcement for things we are doing along with some new information. Sometimes we forget what we have in our tool box!

Excellent!

Very, very good, interesting, and enthusiastic! Her quote of, "Oh black toe, you gotta go, Oh my oh my oh" was very catchy and descriptive!

Great description of each condition. Would love to see her again at another conference!

Very informative and useful information; excellent presentation!

This is 2nd time I completed eval

Very good
