

9/21/2018 201805 Batten the Hatches - Parastomal Hernia Management

Objective	# Resp	Avg.
Identify one method for reducing the incidence of parastomal hernia (PH)	151	4.914
Recommend three options of abdominal support for parastomal hernias	151	4.901

Leanne Richbourg	Seaker Overall Avg:	4.907
Teaching Methods/Ability		4.89
Presentation was fair, balanced and free from commercial bias		4.93
Demonstrated Expertise and effectively communicated the topic		4.91

Learned some new techniques
Excellent presentation. Thank you for sharing your knowledge on parastomal hernias. I learned a lot of new information.
Very informative
New insights. Will had this to patient education packets. Thanks.
Great presentation.
Wonderful presentation. The presenter was fantastic!
Very informative
Good tips to give to patients for hernia support
Great presentation!
Best lecture I've heard on parastomal hernias. I appreciate you getting pictures of all the latest products and getting patient comments. Also the prevention measures I can teach my patients.
Really like exposure to new methods of hernia management
Makes this discussion fun; very knowledgeable
Wow! I learned so much from this session that I will be using in my practice from now on. Leanne said Duke eliminated the hernia info, but I am adding it to my education info.
wonderful presentation!
Wonderful slides. Good Refresher
Leanne Richbourg was a great speaker. She had a lot of good information.
Excellent
Excellent speaker, very knowledgeable and engaging.
Much needed topic to discuss
I really enjoyed this talk, and it inspired me to prepare an educational sheet for our Ostomates at my facility
One of my favorite lectures at conference. LOVED the nursing interventions!
Much needed information for me to take back to my practice and implement. This is a great area of improvement for my institution
Leanne was engaging, and really opened my eyes to the issue that is the "peristomal hernia".
Excellent information and presentation

Ok

Learned a lot about preparing patients for hernias

Very good presentation! Very helpful seeing pictures of treatment options

Interesting and interactive!

Good tip to educate early about the risk of post op parastomal hernia

i learned a lot!

Great information & presentation

I see this all the time

This lecture was excellent and practical with science. Well done

I don't currently work with stomas in my clinic. This was good information to call upon in the future when I do have an opportunity to work with stomas again.

I've never had a patient with a parastomal hernia. Since I'm currently working as a floor nurse I never realized that prevention of parastomal hernias was something I should be teaching my ostomy patients. I work on surgical oncology so it is my floor you

overall informative

good subject

We are seeing more incidence of parastomal hernias. This was a good presentation in abdominal support.

Parastomal hernia is common in my practice. I am thankful for Ms. Richbourg's insights and suggestions.

The presentation was informative and very helpful. The speaker was great!

So knowledgeable!

GOOD

Excellent presentation

Great slides

Excellent presentation and knowledgeable speaker. Thank you.

Very informative

Good information

Different options for replacements of hernia belts were very interesting. Also will be more aware of the need to place a focus on peristomal hernia prevention with the ostomy patient.

very valuable information

Had a great impact on what and how I will teach my patients

A demonstration of how to measure for a hernia belt would have been helpful. Liked the other suggestions to use other than a hernia belt

Great

Good tips...

excellent content

Very well presented.

Interesting facts on the size of surgeons hands in relation to the size of a stoma that is created! The median aperture of those with hernias is 35 mm, and the average size of a surgeon's hands creates an aperture size of 35 mm. Great information througho

good

Excellent and very helpful lecture. I am not comfortable with the management of hernias and hernia belts - I have a much better idea now.

tHIS SESSION OPENS MY EYES OF HOW IMPORTANT IT IS TO INCLUDE PERISTOMAL HERNIA EDUCATION IN INITIAL TEACHING LESSON.

interesting information

Great presentation. Learned some new techniques to pass on. Wonderful speaker
