

9/22/2018 201810 Aye, Captain! Review of Current Research Topics Related to Lower Extremity Wounds

Objective	# Resp	Avg.
Compare efficacy/effectiveness of pharmacologic and non-pharmacologic methods to manage lower extremity wounds	147	4.898
Describe current research specific to new advanced technologies	147	4.891

Teresa Kelechi	Seaker Overall Avg:	4.898
Teaching Methods/Ability		4.89
Presentation was fair, balanced and free from commercial bias		4.89
Demonstrated Expertise and effectively communicated the topic		4.91

- Interesting to see what could become the future of wound healing.
- interesting concepts
- Enjoyed her enthusiasm about research
- Wonderful presentation
- Excellent
- Appreciated new areas of research regarding pain, inflammation within this population
- Great information about new research and technology.
- Very useful, somewhat repetitive from the pre-conference 2 session.
- this presentation gave me great information for dealing with my Leg pt's.
- very interesting. Learned new information
- Good information
- Cooling technique interesting and symptom identification (pain, itching, throbbing and ache) will use in my practice now.
- Got lots of new information
- Great presentation
- Enlightening regarding ongoing and current research.
- This is what I see every day! Teresa is an excellent teacher with very good tips. I especially appreciated the info related to comfort care.
- Excellent presentation.
- Great to learn about all the nursing research. Great evidence based lecture with scientific rigor.
- Great speaker and wonderful presentation of information
- good case studies
- Teresa is very captivating during her lectures. She always gets me thinking about new opportunities in research.
- Fascinating new information
- Presenter was very upbeat. information in regards to lower extremity treatment options was exceptional. Very interested in the FLIR device for advanced assessment opportunities.
- Great presentation

A great presentation and speaker

Great info! Great presentation!

This was energetic, informative, offered a lot of information to take back. Fantastic.

GOOD

Enjoyed hearing about new technologies.

Fascinating research - cutting edge treatments! I really enjoyed Teresa's presentation

Good information

I felt sorry for for having to speak after Eric

Teresa is the epitome of science and practicality. Wish she spoke more!

I was very interested in hearing about these new ideas. I needed more time and information on this topic. The population I work with is mostly lower extremity wounds.

Teresa brought in the research side to the woc nurse. She did it with such energy and passion that she inspired me as a young woc nurse to see the value and necessity of research. I'm excited to see the results of using the thermal technology on trauma pa

EXCELLENT! Always enjoy listening to Teresa Kelechi. Remarkable research to determine effects of other options with cold therapy for lower extremity wounds!

New information to treat this common condition is refreshing.

Great session. Dr. Kelechi is always amazing!

cooling was very interesting

Great presentation.

Very informative. Very entertaining.

great topic

LOVE her talks

Very well delivered

Excellent lecture - I felt inspired and motivated!!!

Captivating presenter!

Dynamic, enthusiastic, knowledgeable! She was as good today as she was for the Pre-Conference presentation. Learned several concepts.....one of which is if temperature increases by 2-4 degrees in an area the patient is at risk for ulceration. Low tech the

Teresa combined gut-busting humor and excellent research to give a fun experience at learning. Masterful and informative presenter.

Excellent presentation! Useful information to use in practice.

Helpful to know how where research in this area is focused

She is always such an informative speaker!

Excellent, very informative. engaged with audience and well organized

engaging lecturer

Great info and ideas
