

**9/20/2018 PreCon2 Lower Extremity/Foot Assessment & Management (hands on)**

Objective	# Resp	Avg.
Describe key components of lower extremity and foot assessment and management	42	4.929
Perform skills such as ankle-brachial index, neurological and vascular examination and compression wrap application	42	4.929

<b>Myra Varnado</b>	<b>Seaker Overall Avg:</b>	<b>4.881</b>
Teaching Methods/Ability		4.83
Presentation was fair, balanced and free from commercial bias		4.88
Demonstrated Expertise and effectively communicated the topic		4.93
<b>Teresa Kelechi</b>	<b>Seaker Overall Avg:</b>	<b>4.921</b>
Teaching Methods/Ability		4.90
Presentation was fair, balanced and free from commercial bias		4.90
Demonstrated Expertise and effectively communicated the topic		4.95

Hands on activities are great

Very good, dynamic speaker with great enthusiasm for her subject area! Truly enjoyed the presentation and the opportunity to refresh my memory on lower leg assessment and the hands on of the session.

The information is always good to review. Speakers shared their enthusiasm in caring for folks with lower leg issues.

Wish for better organization of skills time. Including separated spaces for each of the 3 stations. Noise level got high it was hard to hear excellent explanations and tips.

Great breakout sessions.

Love the hands on.

great

Great session

Very nice session!

Excellent discussions/demonstrations

Found the foot assessment to be very useful. Both Myra and Teresa were very engaging.

Liked the way the activities were set up and run. In the future, Dr. Kelechi should wear her lavalier mic at all times when speaking. She didn't have it for the discussions after the presentation by Varnado and several of us had trouble hearing her.

Excellent

This was a good refresher on techniques. There was new information about thermal that was an interesting intro to the later session on lower extremity new technology.

Great

Excellent command of product content. Presentation of use of thermal imagery and temperature to monitor inflammation.

I have a limb salvage program at my facility which is quite new. This class was so valuable for increasing my confidence with foot assessment. What a great way to start the conference.

VERY INFORMATIVE

loved the hands on stations

The lectures were excellent and new data. The game was good recall. However, not enough time nor organization for the clinic part of class

loved the hands on experience along with skills assessments that are valuable to current practices

Enjoyed the foot assessment review

This was very helpful

This session was very educational as we didn't just learn the content we were able to learn hands on. It's difficult to take in a lot of visual and verbal content but the hands on helps to build memory. I had never performed an ankle-brachial index so thi

Really got a lot with the hands on
